EDUCATION

📅 09/2021 - 06/2024   📍 Tsinghua University, Beijing
- **M.Sc. degree** in Institute for Network Science and Cyberspace
- Advisor: Prof. Mingwei Xu

📅 09/2017 - 06/2021   📍 Tsinghua University, Beijing
- **B.Eng. degree** in Department of Computer Science and Technology

RESEARCH INTERESTS

- **Programmable network and network function offloading.** I have worked on newly emerged programmable network hardware since 2020, including programmable switching ASIC, SmartNIC, etc. I'm familiar with the design strategy and implementation of various programmable offloading systems. I also have some knowledge about software acceleration techniques, e.g. eBPF, DPDK.
- **High performance network.** I have some experience in RDMA and high performance network. I joined lots of discussions about RDMA applications in industrial scenarios.
- **Distributed ML acceleration.** I've learned a lot about the state-of-the-art acceleration techniques of data-parallel distributed ML training, including on-switch aggregation, gradient compression, communication library optimization, etc.

PUBLICATIONS

- IMap: Fast and Scalable In-Network Scanning with Programmable Switches. **[NSDI'22]**
  Guanyu Li, Menghao Zhang, **Cheng Guo**, Han Bao, Mingwe Xu, Hongxin Hu, Fenghua Li. CCF-A/TH-CPL-A, full paper acceptance ratio: 50/298 = 16.8
- Switches are Scanners Too! A Fast and Scalable In-Network Scanner with Programmable Switches. **[HotNets'21]**
  Guanyu Li, Menghao Zhang, **Cheng Guo**, Han Bao, Mingwe Xu, Hongxin Hu. CCF-C/TH-CPL-B, full paper acceptance ratio: 31/101 = 30.7

WORKING EXPERIENCE

📅 06/2022 - 09/2022   📍 ByteDance, Beijing
- Internship in the **High Speed Network** group.
- Keynotes: RDMA adaptive routing, IB network, distributed ML acceleration.

PATENTS

SELECTED AWARDS

- 🏆 Outstanding Graduate, Department of Computer Science & Technology, Tsinghua University, 2021
- 🏆 The School Scholarship of Academic & Innovation, Tsinghua University, 2020
- 🏆 The Scholarship of Future Star, Tsinghua University, 2017
